PREMIUM QUALITY ASSURANCE

With quality comes efficiency. At Nelson Group of Companies, we ensure focused quality control across all our processes. We view our processes in the light of how a step might be done faster and better to improve the overall efficiency. We have adopted a 'process approach' that focuses on outputs and customer satisfaction first; thus we work back into the process to see what is being done to enhance customer satisfaction.

www.nelsonlaminare.com

This is specially curated collection, which has designs inspired from nature & the world of art.

What you are about to see is a world of fascinating laminates that give you a unique opportunity to choose some of the most iconic designs.

Some designs that stand out with their bold and expressive appeal, while others make a statement about the sense of refined richness in a subtle manner. Either way, the designs job is to create a space that makes the life enjoyable and worth admiring. So when you are choosing a laminate, you aren't just randomly picking the shades that you like, but making a thoughtful selection of shades & designs that make your design more lively, more enjoyable.

In this quest of crafting your own, lively space, we are your perfect companions.

NELSON LAMINATE PVT. LTD.

Nelson Laminate is run by a group of enthusiastic individuals. We are a young company creating big waves since our foundation. Representing only the finest laminates in partnership with reputable suppliers, we take pride in bringing to the local market design-centric and quality driven surface solutions under the Nelgo® brand.

Designing a new home is a balance of form, function, touch of colour and most importantly, personal style. Endorsed as a go-to favourite among architects, designers and homeowners alike, Nelgo® strives to continue delivering sustainable design solutions that are diverse in aesthetics, functions and cost-effectiveness. We also believe in providing homeowners with the best – both in quality and affordability.

Nelson accounts for a company of highly motivated professionals assembled to best serve each function within the company. Together, they share an extensive scope of industry know-how and experience, guided by a simple philosophy of "layering to be the best".

Our laminate specialists constantly have their fingers on the pulse of the global design industry. This allows them to curate new designs and product innovations that meet customer demands and are aligned with current and emerging trends.

LAYING INSTRUCTIONS

- Before Use ensure that the Surface or plywood and laminates is clean, dry, levelled and free of oils, excess moisture or other contaminants, such as dust, synthetic particles, etc.
- Only Use White PVA Adhesive to stick the sheets. Apply Double Layer of Adhesive on Edge (Min. 3-4 Inch) of Both The Surfaces.
- The adhesive should always be Stirred before use. Sufficient adhesive should be applied on both of the surface to be bonded. Don't add water into the adhesive, it makes the bonding weak.
- Once adhesive applied is thickly in nature (usually requires 5-10 minutes, depending on atmospheric conditions), the laminate should be placed on the surface, accurately aligned.
- Sufficient bonding procedure to ensure intimate contact necessary for an adequate bond should be applied over the entire area using as much as procedure as possible without damaging the assembly.
- Pinch rollers(rotary press) and heavy weighted rollers are ideal. Hand rolling should be done from the canter to the edges to ensure the removal of air bubbles. The edges should be rolled twice.
- For satisfactory bonding, the pasted sheet area should be kept under pressure for 12-18 hours (depending on climate).
- In rainy season or when humidity is too high, moisture may-condence on the surface during drying (Know as "blushing")and will prevent an acceptable.
- Hot spray or forced air drying may be used to help prevent this condition.
- It is recommended that the max sheet size used for vertical field application be limited to 610x240 mm (2x8 ft.).
- When Laminate is pasted vertically, maintain uniform pressure on all sides till adhesive is dried.
- To avoid stress cracking, avoid making cut outs having sharp corners and rough edges.
- A gap of minimum 2mm should be maintained between two laminates while pasting side by side.
- Due to transportation limitations laid the laminate sheet on flat surface in between 2 plywood sheets for minimum 48 Hrs.
