COLLECTION

ABOUT

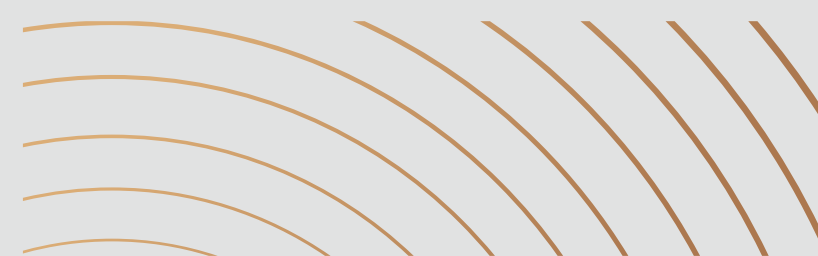

UNLEASH
YOUR STYLE WITH
NEVINO
LAMINATES

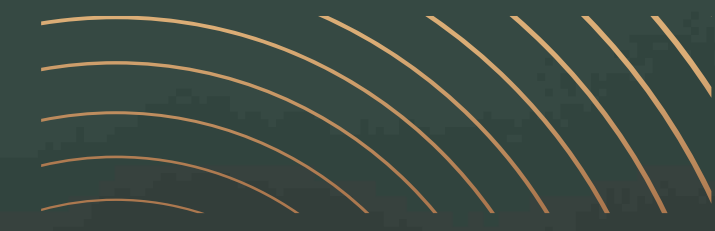

Nevino, a technology-induced log of laminates is a distinctive platform providing a vast collection of laminates belonging to different categories. It has classic pieces having timeless finesse. It also has nextgeneration pieces having a contemporary feel. This catalog addresses nature better than all as it has some of the gorgeous pieces that imitate the beauty of wood to the fullest. Having them around can make you feel one with wilderness and poise altogether. Apart from that, there are certain pieces having the look and feel of real fabric. Getting them on board is an assertion of inviting prime elegance into your space. Not to miss out on one of the most loved finishes of the current time, matt, Nevino also has the inclusion of striking matt finish laminates. The soft and subtle finish of matt is accompanied by pallid hues that narrate the tale of sobriety. The collection has also covered elements of glamour. All in all, it is a go-to almanac of surface décor elements having best of both worlds.

TECHNICAL SPECIFICATION

PROPERTIES	Specified Values as per IS:2046-1995	VERIFIED
Thickness	1.00 mm (± 10%)	✓
Resistance to Surface wear	350 (Revolutions)	✓
Resistance to immersion in boiling water	10.0% (Maximum)	✓
-Mass increase (%)	11.8% (Maximum)	✓
-Thickness increase (%)		
Resistance to dry heat 180°C	Not worse than 4	✓
Dimensional Stability at deviated temperature	0.5% (Maximum)	✓
-Longitudinal (%)	0.9% (Maximum)	✓
-Transverse (%)		
Dimensional Stability at 20°C	0.375% (Maximum)	✓
-Longitudinal (%)	0.600% (Maximum)	✓
-Transverse (%)		
Resistance to impact by small diameter ball	20 N (Minimum)	✓
Resistance to cracking	Not worse than 4	✓
Resistance to scratching	2N (Minimum)	✓
Resistance to staining	Not worse than 5	✓
Resistance to color change (Wool standard)	Not worse than 6	✓
-In xenon arc light	Not worse than 5	✓
-In enclosed carbon arc light		
Resistance to cigarette burns	Not worse than 3	✓
Resistance to steam	Not worse than 4	✓
Appearance	should be free from foreign particals	✓

Do not use active acidic chemicals or sharp / wired brushes for cleaning the HPL Laminates surfaces

Avoid Direct sunlight / continuous light from the HPL Sheet These may cause to color fading due to UV Rays

Extra care required in vertical pasting of Laminated sheet as there is possibility of bubbles due to lack of uniform pressure

Cracking at corners & around cuts may be caused by improper conditioning, Improper bonding, poor planning. Avoid all these to prevent cracking at corners.

NO CLAIM WILL BE ENTERTAINED FOR AIR BUBBLES

NO CLAIM WILL BE ENTERTAINED FOR CRACKING ARISING OUR OF GROOVE CURRYING OR L SHAPE

General Information :

- Product : High Pressure Decorative Laminated Sheets
- Size : 2440mm x 1220mm (8x4 Feet)
- Thickness : 1mm (other thickness available on request)
- Quality Standard : Design base paper are genuine imported. Use of best quality kraft paper. Use of 100% melamine resin and 100% phenolic resin. Use of best chemicals and raw material for better flexibility & durability.
- Limited Warranty : Nevino warrants that its products are reasonably free from manufacturing defects. The products when properly used, will comply, with normal deviations, to related manufacturing specification. It excludes damage resulting from accidents, abuse or lack of care, improper use, or alterations. We recommend doing a proper inspection of the product before installation and our liability is limited to the extent of the cost of the product only. Nevino laminates are used for various applications, without possibility of control over the manufacturing of the finished product. The company does not assume obligations or liabilities arising from the furnishing, sale, installation or repair, use or subsequent sale of any product, to any person or entity.
- Care & Maintenance : Cleaning should be carried out with a soft moist cloth and warm solution. Do not use detergents containing abrasive particles or excess soda.
- Note : (1) Samples presented are indicative of colour, pattern and surface finish but not of actual thickness. (2) Finishes other than shown here are available on request.

Direction To Use :

- before using the laminate, Ensure that the surface of plywood and laminate is clean, Dry, Leaved and free of oils, Excess moisture or other contaminants, Such as Dust, Synthetic particles, Et cetera.
- Always stir the adhesive before use. Sufficient adhesive must be applied on either or both the surfaces to be bonded. Do not add water to the adhesive as it makes the bond weak.
- Once the adhesive applied if tacky in nature (Usually Requires 5-10 Minutes, depending on the atmospheric conditions), The laminate should be placed on the surface, accurately aligned.
- Apply sufficient bonding pressure to ensure intimate contact necessary for and adequate bond over the entire area using as much pressure as possible without damaging the assembly. Pinch (Rotary press) and heavy weighted rollers are ideal. Hand rolling should be done from the centre to the edges to ensure the removal of all air bubbles. Roll the edges twice.
- For satisfactory bonding, keep the area under pressure for 12-18 hours (Depending on atmospheric conditions). In rainy season or when humidity is too high, moisture may condense on the surface during drying (known as "Blushing") & will prevent an acceptable bond. Hot spray or forced air drying may be used to help prevent this condition.
- we recommend the maximum sheet size used for vertical field application be limited to 610x2440mm (2x8 Feet). If larger panels are required, fabricate them in the shop.
- When pasting laminate vertically, maintain uniform pressure on all sides until adhesive is dried. To avoid stress cracking, avoid making cut-outs having sharp & rough edges.
- Maintain a gap of 2mm between two laminated while pasting side-by-side.
